

Cortado Mobile Solutions Becomes Official Android Zero-Touch Enrollment EMM Partner

(Berlin, September 11, 2019) Enterprise mobility expert Cortado Mobile Solutions GmbH is now an Android zero-touch EMM partner. This officially confirms that Cortado's MDM solutions are able to run zero-touch-enabled Android devices simply and securely without the IT department having to manually configure the devices.

Android zero-touch enrollment is ideal for easily and securely deploying a larger number of Android devices with little administrative effort. The devices can be sent to the employees in their original packaging, without the IT department having to lay hands on them first.

With the Cortado MDM solution, which the Android zero-touch enrollment supports, smartphones and tablets can be remotely pre-configured completely online and provided with the necessary administrative settings. Once the employees remove their device from the original packaging, the device is automatically enrolled and can be completely set up and ready to use in just a few minutes.

The only requirement is that the devices must be zero-touch-compatible Android devices purchased from an authorized zero-touch reseller.

“We are thrilled that we are now recognized and listed as an official Android zero-touch enrollment EMM partner,” said Benjamin Schüler, CTO of Cortado Mobile Solutions GmbH. “Thanks to zero-touch, our customers can effortlessly roll out Android devices in large numbers.”

More information about Android zero-touch with Cortado MDM can be found at <https://blog.cortado.com/android-zero-touch-enrollment-how-it-works/>
